

# Virtual Workshop Coaching

Focused, Flexible, Scalable, Impactful

A variety of coaching options for all forms of virtual training workshops that offer personalized and scalable coaching resulting in an enhanced learning experience.

## Overview

2Win offers our clients the flexibility of virtual or in-person delivery for every workshop we provide. With over ten years of experience delivering virtual training, we recognize and embrace the need for flexible coaching options that optimize the learning experience of students, and scale to the needs of all organization sizes. Each virtual coaching method we offer results in an immediate and positive impact on your team's prospect and client engagements

The three coaching methods offered are One-on-One (1:1), Small Group, and Master Class. Each method has been refined and curated since 2008. 1:1 coaching is perfect for an individual new-hire, start-up, and small to mid-sized organizations. Small-Group coaching is ideal for clients that want to assemble multiple teams of four professionals and have each participant learn from the performance of each team member. Small group coaching is further enhanced by the "just-in-time learning" all participants receive during the individual coaching of each team member in their group. Master Class coaching is perfect for global enterprise organizations. In this style of coaching, larger groups observe selected team member performances and benefit from the just-in-time learning delivered during the coaching of their peers.

## Coaching Method Comparison

	1:1	Small-Group	Master Class
Participants per Coaching Session	Single	2-4 at a time	12-120
Scaling	One at a time	Multiple Groups	Large Groups
Exercise Coaching	Workshop Dependent	Workshop Dependent	Workshop Dependent
Number of Coaching Sessions	One	Two	Multiple/Flexible
Availability	Globally	Globally	Globally
Scheduling	Self-Register	Coordinated	Coordinated
